

Advisory Committee, Covid Park and Recreation

April 15, 4:00 P.M.

Attending: Michael West, Henry Swartz, John Wapner

Continued discussion for Covid Protocols for the park facilities and activities. First focus was large events at the new pavilion. We have occupancy numbers clear and reviewed protocols and procedures and report for positive cases. We discussed streamlining the relationship between The recreation director, our advisory committee, and the board. We agreed that going to the board for approval for changes and all solutions to presenting problems is to cumbersome and agreed Mike should raise that issue with committee's support. We reviewed current youth soccer issues and using the park for a spring program since Chatham Central School facility unavailable. Direction unclear but Mike feels the program can be run safely for all age groups but the little folk age 4-6. Discussed progress for assuring vaccine shot for all summer camp staff. It seems like this will be possible but how exactly it will happen remains unclear. We adjourned at 5:00 P.M.
