

TOWN OF CHATHAM – CSATF – AGENDA – 7-28-20

1. Abi / Deborah / Melissa – recycling sub-committee and letter, requesting other Committee Member Feedback, please review the draft letter forwarded to you on this subject.
2. Kevin / Angus – final review of the Solar Mapping Tool project – summary.
3. Kevin – NYPA LED Streetlighting upgrade update. Had virtual meeting with reps from NYPA, and received updated proposal from NYPA. Also received draft letters requesting buy out information from both utility companies serving the Town, and am working on those. Once we receive the information from the utilities, NYPA can complete their proposal, and is willing to present the whole thing at a Town Board Meeting, since we have so many new board members since their last presentation back in 2018.
4. Angus – Solarize Chatham program update
5. Kevin – EV WATTS program cooperation
6. ?? – Composting project , possible coordination with other municipalities – Karla had expressed interest, is anyone else interested in working on this? Kinderhook has been talking about getting something going, will anyone want to contact them to see what might be developed?
7. Karla / Angus – “Swap Shop” set up at Transfer Station. This was brought up at the last meeting. Is there any interest in pursuing this idea?
8. Angus? – Update on Comp Plan Climate Related Questions --- is there any? Should we review what we already have put together?
9. Any other business to be introduced or discussed...?
